TELESCOPING DUST SUPPRESSION

WHAT GOES UP BRINGS DUST DOWN!

A special blend of engineering and manufactured products allow you to bring water mist to a higher level – and to be able to spray down on dust in a selected area, on just about every special site!

We take a Terex Genie S-65 Manlift with foam filled tires, mount a 45kVa MultiQuip Gen Set on the frame, replace the man basket with a 480V 3-phase 25HP fan that generates about 18,000CFM, and add water pumps, hose reels and a 100% HBC Remote Control to create the ultimate 65' Telescoping Dust suppression unit.

The unit has 360° rotation allows the 8'-2" base width flexibility to take the 30'-11" length up to 65ft and directionalize water mist to the area where it is needed.

GENERAL SPECIFICATIONS

GENIE S-65

- 4 Wheel Drive
- Foam Filled Tires
- 8'-2" width
- 30' - 11" Standard Machine Size
- 14.5 Ground Clearance
- 48hp Deutz Tier 4F Diesel Engine
- 35gal fuel tank - 2.9gph
- Overall Weight: 23,550lbs
